

Instructions Booklet

19th World Sudoku Championship

Version : 1
Published on : 16 Sep 2026

MONDAY, 12th OCTOBER

Session 1

01 Kuru Clan	09:00 - 09:55	55m	600 points	Individual
02 Pandu Putra	10:05 - 10:40	35m	350 points	Individual
03 Kauravas	10:55 - 11:45	50m	650 points	Individual
04 Acharya Drona	11:55 - 12:30	35m	350 points	Individual

Session 2

05 Escape from Lakshagriha	14:30 - 15:10	40m	450 points	Individual
06 Quest for Celestial Weapons	15:20 - 16:05	45m	500 points	Individual
07 Pandavas in Disguise	16:15 - 17:05	50m	700 points	Individual
08 Team Round				Team
09 Team Round				Team

TUESDAY, 13th OCTOBER

Session 3

10 Dharma Yuddha	09:00 - 10:15	75m	900 points	Individual
11 Arjuna's Revenge	10:30 - 11:05	35m	350 points	Individual
12 Ashwatthama is Dead?	11:20 - 12:00	40m	400 points	Individual

Session 4

13 Team Round				Team
14 Team Round				Team
15 Team Round				Team
16 The Final Duel		60m	450 points	Playoffs

Competition Hall Rules

1. Each competitor has to sit at any of the pre-allocated desks of their respective teams in individual rounds. Teams have to work at their pre-allocated desks for team rounds.
2. Prior to the start of each round, competitors must ensure they are at their desks ready for the start of the round. Late arrivals may not be permitted to enter the competition hall to take part in a round at the discretion of the organizers.
3. Prior to the start of each round, competitors must clearly write their name, team and registration number on the front page of their competition booklet into the allocated space. If this information is not complete, then the organizers reserve the right not to award any points to that competitor for that round.
4. Competitors must not open their booklets before the official start of the round. When the signal for the start of the round has been given, competitors may open their booklets and begin solving the puzzles.
5. During each individual round, competitors have to remain silent, unless declaring completion of a round.
6. During team rounds, team members may talk to each other, unless it is stated otherwise in the round's note, but should do this with respect to other teams.
7. To declare a round complete, a competitor must close the competition booklet, clearly state 'finished' and raise an arm with the booklet. The competitor's arm must be raised until the booklet is collected. The same rules apply for the team rounds.
8. Competitors or teams who complete a round more than five minutes in advance, are allowed to leave the competition hall quietly. Competitors or teams who complete a round with five minutes or less left are not allowed to leave their desks to not cause unnecessary disruption to fellow competitors.
9. Competitors who leave the competition hall for any reason will be not allowed to continue in that round.
10. When the signal to finish a round is given, competitors have to stop solving immediately, close their booklets, put their pens/pencils down and their hands up with their booklets for collecting.
11. At the end of a round, competitors have to remain seated until all booklets have been collected.
12. Mobile phones and electronic devices are not permitted to be used in the competition hall during the rounds. The devices have to be turned off and must not be placed on the competitor's desk.
13. Only team captains and official observers equipped with a name tag are allowed to enter the competition hall while either individual or team rounds are taking place. Other non-competing participants may enter the competition hall at the discretion of the organizers.
14. Competitors may not use cameras or other recording devices during rounds. Only observers may do so, at the discretion of the organizers. They have to respect the competitors and not use flash photography or cameras with excessive sounds.
15. When a competitor believes that there is a problem with a puzzle, they must clearly state that puzzle is wrong by writing 'Wrong puzzle' next to it. The competitor must not notify the organizers during the round. This will be investigated upon completion of the round.
16. Puzzles can be completed in any order within a round, unless it is stated otherwise in the round's note. The points' value of a puzzle is an indication of its expected difficulty, although individual solving experience may differ. The difficulty of an example puzzle does not necessarily reflect the difficulty of the corresponding competition puzzle.
17. The boxes above each puzzle are reserved for markers' notes. Competitors must not write in the boxes.
18. Permitted items which can be used in the competition hall, unless stated otherwise, are: pens, pencils, pencil sharpeners, erasers, rulers, scales, blank papers and instruction booklets annotated with notes regarding puzzle instructions and preparation notes.
19. Drinks and snacks are permitted as long as they do not disturb other competitors with a strong smell or rustling packet.
20. It is strictly forbidden to use electronic devices such as music players or headphones or any type of calculator. Use of such equipment may lead to the disqualification of the competitor.
21. Any other items brought into the hall must be kept in a bag on the floor and placed under the competitor's desk, so as not to block the aisles.

22. When a round has been evaluated, fully marked booklets are returned to a team member of the respective country.
23. In case of any query after a booklet has been returned to a competitor, the query must be raised within the specified time. The booklet should be left with the organizers for investigation.
24. Puzzles may be photographed during the marking phase in order to prevent subsequent interventions.
25. Team captains are responsible for ensuring that any information given to them related to the competition is effectively relayed to their team.
26. In case of a major mistake in one of the rounds, organisers reserve the right to cancel the round, either by removing it from the schedule, or by not rewarding any points for it to any of the competitors.
27. The official competition booklets will not contain examples given in the instruction booklet. Therefore, we recommend to bring the Instruction Booklet, which contains an example of every Sudoku that will be part of the championship.
28. In the team rounds, the official competition booklets may not contain the instructions of Sudokus, only the names. It is advised to bring at least one Instruction Booklet for a team for these rounds.
29. In any case of inconsistency between the instruction booklet and the official competition booklets, e.g. instructions or points, the information in the final version of the instruction booklet will be considered valid.
30. In the competition hall, a timer counting down to the end of the round will be visible for all the competitors.

Scoring and Bonuses

1. Points will be awarded only for fully and correctly solved puzzles. In general, there is no partial points unless it is stated otherwise in the round's note.
2. In individual rounds, the bonus points for a round for each full remaining minute will be awarded to any competitor who correctly solves all the Sudokus in the round.
3. In team rounds, the bonus points for a round for each full remaining minute will be awarded to any team who correctly solves all the Sudokus in the round.
4. At the judge's discretion, 0.8x bonus, rounded to the closest integer, will be awarded in the case of a single minor mistake in no more than one Sudoku. A minor mistake is considered as at most two incorrectly filled cells in at most one of the Sudokus.

Any breach of these rules may lead to a competitor or team being disqualified from the round or competition.

The decision of the tournament director is final.

For Sudokus with partial points, the points will be awarded only if it is part of the overall solution.

Acknowledgements

All the examples in the instructions booklet were made by the organizing team with certain examples sourced from:

1. Past WSPC Instruction booklets
2. Past LMI Contests
3. Puzzle Innovation contest

Glossary

Odd and Even

Odd digits are 1, 3, 5, 7, 9.

Even digits are 2, 4, 6, 8.

Parity

Even and odd are different parities. Two digits have the same parity if they are both even or both odd.

Prime

Prime digits are 2, 3, 5, 7

Adjacent and Neighbouring

Cells sharing an edge are adjacent. A cell can have a maximum of four adjacent cells.

Cells sharing an edge or a corner are neighbouring. A cell can have a maximum of eight neighbouring cells.

mxn box

A mxn box is a box with 'm' rows and 'n' columns.

Touching

Cells sharing an edge or a corner touch each other.

Orthogonal

Cells sharing an edge.

Knight

A knight, as in chess, moves two steps in one direction and one step in a perpendicular direction.

Identical digits

Identical digits are digits that are exactly the same.

Cage

Cages are areas marked with a dashed line within a grid.

Consecutive

Two digits are consecutive if their difference is 1.

Arithmetic progression

A sequence of digits are in arithmetic progression if every consecutive pair of digits in the sequence have the same difference.

The difference cannot be 0.

Checkerboard

A checkerboard pattern is a 2x2 area of cells where the top-left and bottom-right cells are of one type and the top-right and bottom-left cells are of another type.

Competition Booklet

Most of the competition booklets will be printed on 100 GSM papers. Some rounds will be printed on higher GSM papers.

The grid size, the shading and other decorations of majority of the puzzles in the competition booklets will be as displayed in the image on the right.

Kuru clan traces the origins and ancestry of the princely cousins, the Kauravas and the Pandavas, the protagonists of the Mahabharata. Similarly, this round traces the origins of sudoku and the World Sudoku Championships, featuring classic sudoku and the initial few variants that were invented.

1. Classic Sudoku

25 points

Place a digit from 1 to 9 into each empty cell in the grid so that each digit appears exactly once in each row, column and 3x3 outlined box.

		9				8		
	8		6		1		4	
		2		5		9		
			1		3			
		3		4		5		
	6		3		4		1	
		5				2		

3	4	6	9	7	8	1	5	2
1	2	9	4	3	5	8	7	6
5	8	7	6	2	1	3	4	9
8	1	2	7	5	6	9	3	4
9	5	4	1	8	3	6	2	7
6	7	3	2	4	9	5	8	1
2	6	8	3	9	4	7	1	5
4	9	5	8	1	7	2	6	3
7	3	1	5	6	2	4	9	8

2. Killer Sudoku

90 points

Standard Classic Sudoku rules apply. The number at the top-left corner of each cage is the sum of digits inside the cage. Digits do not repeat within a cage.

									7	3	9	7	9	4	8	9	3		

The five sons of king Pandu, the Pandavas, were born to queens Kunti and Madri by the grace of different deities. They went on to be renowned for following the path of righteousness. This round features a Samurai sudoku representing the unity and loyalty between the brothers, with the variants celebrating their celestial origins.

Samurai Sudoku

90 + 80 + 70 + 60 + 50 points

There are 5 overlapping 9x9 sudoku grids. In each grid, standard Classic Sudoku rules apply. Additionally, the following rules apply for the individual sudokus:

No Three in a Line Sudoku (Top Left): There must not exist a run of three or more cells along a marked line that all contain numbers of the same parity (i.e., even or odd).

Creasing Sudoku (Top Right): Digits along each line are monotonically increasing or decreasing.

Palindrome Sudoku (Centre): Digits along each line are a palindrome, they read the same from both directions.

Clone Along Line Sudoku (Bottom Left & Right): These two sudokus are Clone Along Line Sudoku. In these sudokus, digits along the marked lines should be exactly same and in the same order but in any direction.

Scoring

Points will be awarded per fully solved 9x9 grid, provided each grid's solution is consistent with the overall solution. The five grids are worth 90, 80, 70, 60, and 50 points in the order solved: 90 for the first grid completed, 80 for the second, 70 for the third, 60 for the fourth, and 50 for the fifth.

Kauravas were the hundred sons of Dhritarashtra, born to Gandhari in 100 pots by the grace of sage Vyasa. They were infamous for following greed and jealousy, led by their eldest brother, Duryodhana to undermine the Pandavas through trickery. This round features variants of Hundred Sudoku representing the Kaurava brothers.

1. Hundred Sudoku

55 points

Standard Classic Sudoku rules apply. In rows with shaded cells, the sum of number combinations in the shaded cells is exactly 100.

	3		8		5		7	
		8		7		5		
	9		6		1		8	
	7		9		6		1	
		1		4		9

1	2	8	9	3	7	4	5	6

8. Skyscraper Hundred Sudoku

85 points

Standard Hundred Sudoku rules apply. Each digit inside the grid represents the height of a skyscraper in that cell. Each number outside the grid indicates the number of skyscrapers that can be seen in the corresponding row or column. Taller skyscrapers hide shorter ones.

04 Acharya Drona

350 points

35 Minutes

7x Bonus

Individual

Dronacharya, or grand preceptor Drona, was the teacher of the Pandavas as well as the Kauravas. He taught them the basics of warfare like archery, weaponry and martial arts as well as advanced concepts like war formations. This round consists of 9 sudokus which test the participants classic sudoku solving techniques.

05 Escape from Lakshagriha

450 points

40 Minutes

10x Bonus

Individual

Warned by uncle Vidura's coded message, the Pandavas used a secret tunnel dug by an ally to escape the raging fire from the fire trap created by the Kauravas. The charred bodies of a hunter woman and her five sons served as a decoy allowing the Pandavas to remain in hiding. This round features sudoku variants which depict various scenes from this grand escape from Lakshagriha (House of Wax), which was the first major flashpoint between the cousins.

1. Flame Path Sudoku

30 points

Standard Classic Sudoku rules apply. There must be at least one path from the top left cell to the bottom right cell with cells connected orthogonally, called the flame path. The digits 1, 5 and 9 cannot be placed on the flame path.

06 Quest for Celestial Weapons

500 points

45 Minutes

10x Bonus

Individual

The Pandavas and Draupadi endured a grueling exile following their defeat in the rigged game of dice. During this exile, Arjuna traveled to the Himalayas to perform severe penance, ultimately securing divine powers and mastering cosmic weapons from the celestial deities. This round features innovative sudokus representing the celestial weapons obtained by Arjuna. Most sudokus from this round are inspired by the Puzzle Innovation Contest, 2026 held on Logic Masters India website.

1. Attack the Leader Sudoku

50 points

Standard Classic Sudoku rules apply. The arrow clues indicate all the directions (up, down, left, and right) where the nearest cell with digit higher than the digit in the cell with the arrow are located when looking from that cell.

	4	5	8		6	2	1	
	7	1	6		8	3	2

7	6	4	5	2	3	1	9	8
5	8	9	4	6	1	7	3	2

2. Fractal Sudoku

40 points

Standard Classic Sudoku rules apply. Each 3x3 outlined box also represents a sudoku. Every row & column within each box should contain exactly one digit from the three sets: (1,2,3), (4,5,6) and (7,8,9).

2	6	8	7	3	4	9	1	5
7	1	4	5	9	2	6	8	3

3. Trishula Sudoku

40 points

Standard Classic Sudoku rules apply. For each Trishula, the three cells at the tips of the prongs contain the minimum, average, and maximum digits appearing in the shaded handle region. The correspondence between the digits in the tip cells and the three properties is not given.

3	7	1	8	4	5	9	2	6		
8	4	6	7	1	2	9	8	7	5	3

5. Magic Sword Sudoku

75 points

Standard Classic Sudoku rules apply. Each arrow given outside the grid has the same unknown strength (Y) and attacks in the indicated direction. The number X above it means the first X cells in that direction contain numbers weaker (i.e. lower in value) than the strength of the arrow, while the (X+1)-th cell (if any) contains a number stronger (i.e. equal or higher in value) than it. Determining the arrow's strength is a part of solving.

07 Pandavas in Disguise

700 points

50 Minutes

10x Bonus

Individual

Pandavas spent their 13th year of exile in disguise in the Matsya Kingdom, ruled by King Virata. If discovered by Duryodhana's spies, they faced another 12 years of banishment. To remain hidden each adopted a secret identity and a specific role. This round features 6 variants, paired with their disguised variant forms. Each pair represents one of the Pandavas and their wife Draupadi.

1. Arrow Sudoku

45 points

Standard Classic Sudoku rules apply. The digit in each circled cell is the sum of digits along the path of its arrow. Digits can repeat within an arrow shape.

		6				3

5. Kropki Pairs Sudoku

25 points

Standard Classic Sudoku rules apply. Adjacent cells marked with a white circle contain consecutive digits. Adjacent cells marked with a black circle contains digits where one digit is double of the other digit. The circle between 1 and 2 can be of either colour. All possible circles are not marked.

Dharma Yuddha (or righteous warfare) which lasted for 18 days refers to the just war that was fought strictly according to an ethical code of conduct. The Pandavas and Kauravas agreed on a code of conduct that the war would begin at sunrise and end at sunset. A horseman would fight a horseman, likewise charioteers, elephant troops and infantry would attack only their equals. This round features 9 pairs of frenemy variants, which have contrasting rulesets.

1. Diagonal Sudoku

40 points

Standard Classic Sudoku rules apply. Each main diagonal contains each digit from 1 to 9.

	4					1	5	
8					6			7
7				2				
	5			1				
		6	8		2	5

Arjuna took a fierce vow to decapitate Jayadratha before sunset to avenge his son Abhimanyu or immolate himself. To keep Jayadratha safe, Dronacharya arranged complex battle formations, surrounding him with massive Kaurava forces so he could survive the day. As the sun began to set, Lord Krishna used his Sudarshana Chakra to eclipse the sun, creating a temporary illusion of sunset. Krishna lifted the illusion, revealing the sun was still shining and directed Arjuna to shoot an arrow instantly beheading Jayadratha. This is a relay round of classic sudokus which depict scenes from the various hurdles Arjuna overcame to fulfill his vow.

1, 2, 3, 4, 5, 6, 7, 8, 9. Classic Sudoku

25 + 40 + 30 + 70 + 40 + 50 + 30 + 40 + 25 points

In each grid, standard Classic Sudoku rules apply.

Some cells from the first sudoku transfer to the second some cells from the second to the third and so on. Arrows will be given between sudokus indicating the order of the 9 sudokus.

Cells in which digits need to be transferred are marked in circles.

The cell in the same position in the previous sudoku needs to be identified, and the digit from that cell needs to be transferred into the circled cell.

The example uses 3 Classic Sudokus.

The layout of the 9 sudokus in the puzzle booklet is shown below.

12 Ashwatthama is Dead?

400 points

40 Minutes

10x Bonus

Individual

Krishna devised a plan to break Dronacharya's resolve as he was virtually invincible while armed. Bhima killed an elephant named Ashwatthama and announced to Drona that his son was dead. To confirm the news, Drona asked Yudhishtira, who said "Ashwatthama is dead, whether man or beast", deliberately muttering the latter half of the sentence quietly. This was the only lie that Yudhishtira had ever uttered in his life. Overwhelmed by grief, Drona laid down his arms on the battlefield and Dhrishtadyumna took advantage to use his sword to kill Drona. This round features sudoku variants which depict various scenes from the fall of Drona.

1. Pinocchio Sudoku

25 points

Standard Classic Sudoku rules apply. Some digits are written in a different layout. Exactly one of these digits is incorrect.

After 15 days of war, both armies were severely depleted, and most significant battles were duels between the remaining warriors from both sides. Prominent among these were the night duel between Karna and Ghatotkacha, Bhima and Dushasana, Arjuna and Karna, Yudhishtira and Shalya, Sahadeva and Shakuni and finally between Bhima and Duryodhana.

This final round is the individual playoffs which will be in a knock out duel format between the top 8 participants from the individual rounds. The top 8 seeds will be determined based on the total points in the individual rounds. In case of a tie, the sum of ranks in individual rounds will be used to determine the seeds. In case there is still a tie, a randomizer will be used to determine the seeds.

The round will be held in below format:

The points earned by the participants across the playoff rounds will be added to their base points from the individual rounds to crown the World Sudoku Champion.

In the Final Duel, the participant will get a single chance to submit the solution. The participant who submits the correct solution first, wins the round. If both the participants submit incorrect solution, the participant with more correct cells wins. If the number of correct cells is equal, the participant who submitted earlier wins. If there is still a tie, the participant with higher seed wins.
